

Woodworking Back Saw with Reinforced Blade

This back saw is designed for precise and controlled cuts. It features a rigid blade for stability and a reinforced back to prevent bending.

Product Overview

Precision Woodworking Back Saw

This high-quality back saw is engineered for precise and controlled cuts, making it an essential tool for woodworking, joinery, and fine cutting applications. It features a rigid, hardened steel blade for exceptional durability and long-lasting sharpness. The reinforced back design prevents bending during use, while the ergonomic handle ensures a comfortable, secure grip to reduce fatigue during extended projects.

Technical Specifications

Model Number	DT1901B
Blade Material	Hardened Steel
Key Features	Reinforced Back, Ergonomic Handle, Rigid Blade

Applications

Primary Applications

- Woodworking
- Joinery
- Fine Cutting
