

# Woodworking Back Saw with Stiff Spine

This back saw is designed for woodworking, featuring a thin blade and a rigid spine for stability. It enables precise and controlled cuts, making it suitable for tasks like cutting dovetails and tenons.

## Product Overview

### Precision Woodworking Back Saw

This professional-grade back saw is engineered for high-precision woodworking tasks, including cutting dovetails and tenons. Featuring a high-carbon steel blade with a rigid spine, it ensures maximum stability and prevents blade buckling during operation. The ergonomic handle design provides superior control, making it an essential tool for both enthusiasts and professional joiners.

## Technical Specifications

Model Number	DT1901
Blade Material	High-carbon steel
Cutting Action	Push stroke

## Key Features

### Ideal Applications

- Dovetail cutting
- Tenon cutting
- Fine joinery
- General woodworking

Key Features	Rigid Spine, Ergonomic Handle, High-Carbon Steel, Precision Joinery
