Product Overview

Professional Woodworking Bandsaw Blades

These high-performance bandsaw blades are crafted from premium high-carbon spring steel, ensuring precision and long-lasting durability for woodworking applications. Engineered with optimized tooth geometry and hardened tooth design, they provide consistent, smooth cutting performance across a variety of wood types and thicknesses. Their flexible steel backing is specifically designed to reduce breakage, offering reliable efficiency for professional carpentry and woodworking projects.

Technical Specifications

Available Size Range

Width (mm)	Thickness (mm)
150	1.25
120	1.2
110	1.1
100	1.05
90	1.05
80	1.05

Steel Material Grades

65Mn, SAE 1075, T8, T10

Logistics

Packaging

Coils, available with or without pallet delivery based on requirements.
