

Woodworking Hand Saw with Rigid Blade

This hand saw is designed for cutting and shaping wood. It features a rigid blade for stability and a comfortable grip for extended use.

Product Overview

Professional Woodworking Hand Saw

The DT1700-1 Hand Saw is a precision-engineered tool designed for high-performance woodworking tasks. Featuring a rigid blade for enhanced stability, it ensures clean cuts and superior control when sawing lumber, trimming, or creating complex joints. Built with an ergonomic yellow handle, this tool is optimized for comfort during extended professional use.

Technical Specifications

Design Features

- Ergonomic yellow handle
- Black protective blade finish
- High-stability rigid blade architecture

Model Identification	DT1700-1
Blade Characteristics	Rigid, High-Stability

Application Suitability

Common Applications

- Lumber sawing
- Trimming tasks
- Joinery and precision cutting
