

# Woodworking Machine Tool

This machine tool is a precision cutting instrument for intricate woodworking and crafting projects. It features a robust build with a safety shield, flexible hose, and adjustable speed control.

## Product Overview

### Precision Woodworking Performance

This woodworking machine tool is designed for precision cutting, offering versatile operation for intricate wood projects. With adjustable work table tilting and variable speeds, it provides the control necessary for professional crafting requirements. Its robust build ensures stability and durability, while integrated safety features like the clear debris shield protect the operator during use.

## Technical Specifications

### Model Specifications

Feature	SS13W	SS16W	SS22W
Max Cutting Swing (mm)	330	440	550
Table Size (mm)	250x330	250x330	250x410
Packing Size (mm)	410x380x180	480x390x180	640x420x180

## Performance Metrics

### Performance Metrics

**50 mm**

Max Cutting Thickness

**125 W**

Motor Power

**45 °**

Max Table Tilt

## Operational Details

Operating Speed	750-1500 rpm
Supported Voltages	100V, 110V, 120V, 220V, 230V, 240V
