

# Wound Rotor Three-Phase Asynchronous Motor

This three-phase asynchronous motor is designed for demanding industrial applications. Its wound rotor design allows for adjustable speed and torque, making it suitable for heavy-duty machinery.

YG系列繞道用三相异步电动机

## Product Overview

### YG Series Performance

The YG series wound rotor three-phase asynchronous motor is engineered for demanding industrial environments. Featuring a robust cast iron frame and superior insulation, this motor ensures long-term reliability and performance. Its specialized wound rotor design provides excellent control over speed and torque, making it an ideal choice for heavy-duty machinery.

## Technical Specifications

Motor Type	Wound Rotor Three-Phase Asynchronous Motor
Frame Material	Cast Iron
Key Features	Adjustable Speed, Adjustable Torque, High-Quality Insulation, Robust Construction

## Applications

### Typical Applications

- Cranes
- Hoists
- Heavy-duty machinery
