

Woven Bag Cutting and Sewing Machine

This woven bag cutting and sewing machine integrates cutting, sewing, and collection processes. It ensures precise dimensions and strong seams while featuring a user-friendly interface for parameter adjustments.

Product Overview

High-Efficiency Woven Bag Production

The YZYC-800 is a high-speed, automated woven bag cutting and sewing machine designed for professional bag manufacturing environments. It streamlines production by integrating cutting, sewing, and collection processes into a single unit. This machine is engineered for durability and consistent quality, providing reliable output for diverse woven bag sizes.
