

Wrapped V-Belt for Industrial Power Transmission

This wrapped V-belt is designed for power transmission in machinery and industrial applications. Its trapezoidal cross-section ensures enhanced grip and efficient energy transfer.

Product Overview

Industrial Wedge V-Belt Performance

This wrapped wedge V-belt is engineered for demanding industrial power transmission applications. Its optimized trapezoidal cross-section provides superior grip and efficient energy transfer for heavy-duty machinery. Designed to withstand high operating speeds and substantial loads, it serves as a reliable component for diverse industrial power systems.

Technical Specifications

Designation

3V

Belt Type

Wrapped Wedge V-Belt

Key Dimensions

9.5mm, 8.0mm

Performance Features

Key Benefits

- High power transmission efficiency
- Excellent grip through trapezoidal profile
- Durable construction for heavy loads
- Suitable for high-speed operation
