

Wrapped V-Belt

This wrapped V-belt is suitable for a wide range of pulley systems and operating conditions. It is constructed with a durable wrapped cover for enhanced wear resistance and longevity.

Product Overview

High-Performance Wrapped V-Belt

This industrial-grade wrapped V-belt is engineered for superior power transmission and reliable performance in demanding environments. Featuring a durable wrapped cover, it offers enhanced wear resistance, reduced slippage, and a long service life. The product is manufactured using high-quality natural rubber, ensuring optimal grip and consistent performance across a wide range of pulley systems and operating conditions.

Standards & Compliance

Certifications

ISO 9001, TS16949:2002

Technical Specifications

Key Performance Metrics

9.5 mm

Width

775 mm

Length (La)

Material Characteristics

- Superior natural rubber composition
- Wrapped cover for enhanced wear resistance
- Low-stretch design
- Friction-enduring structure

Application

Application Compatibility

Automotive • Industrial Machinery • Power Transmission Systems
