Product Overview

Professional Abrasive Solution

This abrasive wheel is designed for efficient surface preparation, including the removal of rust, paint, and flaking materials. Featuring a durable non-woven abrasive material bonded to a fiberglass backing, it offers both strength and flexibility for demanding tasks. The integrated quick-change system minimizes downtime, making it an ideal choice for consistent performance on metal, wood, and plastic surfaces.

Technical Specifications

Maximum Speed

12200 RPM
Max RPM

Diameter

125 mm

Compatibility

X-LOCK Mount, Angle Grinders, INOX

Features & Benefits

Key Features

- Quick-change system for rapid disc swaps
- Open web design resists loading
- Durable fiberglass backing
- Suitable for grinding and polishing

Safety & Usage

Safety Requirements

- Wear dust, ear & eye protection at all times
- Always wear appropriate safety items for protection
- Keep away from children
