

Xenon HID Lamp for Textile Machinery

This Xenon High-Intensity Discharge (HID) lamp is designed for use in textile machinery. It provides a bright, focused light source for various textile manufacturing processes, including inspection, color matching, and quality control.

Product Overview

Industrial High-Intensity Lighting Solution

This Xenon High-Intensity Discharge (HID) lamp is engineered specifically for the demanding requirements of textile machinery. It delivers a bright, focused illumination critical for inspection, color matching, and rigorous quality control processes. Designed for industrial longevity, this lamp combines high luminous efficacy with a spectral output optimized for precise fabric and material assessment.

Technical Specifications

Light Source Type	Xenon High-Intensity Discharge (HID)
Compatibility	Textile Machinery, Standard HID Ballasts, Standard HID Fixtures

Performance

Performance Highlights

1 High Luminous Efficacy	1 Long Operational Lifespan
------------------------------------	---------------------------------------

Operational Benefits

- Optimized spectral output for accurate color rendition
- Robust construction for industrial environments
- Reduced maintenance downtime
- Focused light distribution for quality control
