

# XK-250 Rubber Mixing Mill

This mixing mill is designed for processing both rubber and plastic materials. It utilizes heavy-duty rollers to ensure efficient mixing and compounding.

## Product Overview

### Industrial Rubber Mixing Mill

The XK-250 Mixing Mill is a robust, heavy-duty machine specifically designed for the plasticating and mixing of rubber and plastic compounds. Engineered for reliability in demanding industrial environments, it features a powerful motor drive system and high-quality rollers suitable for sheeting, refining, and cracking reclaimed rubber. The unit strictly adheres to current national safety standards to ensure operator protection and operational consistency.

## Technical Specifications

### Roller Configuration

**250 mm**

Roller Diameter

### Core Applications

- Plasticating and mixing of rubber
- Processing of plastics
- Warming and sheeting rubber compounds
- Cracking reclaimed rubber
- Refining reclaimed rubber

## Compliance and Safety

### Included Safety Mechanisms

- Emergency stop devices
- Protective safety guards

Safety Compliance

GB-20055-2006
