

XK-400 Rubber Mixing Mill

The XK-400 rubber mixing mill is a robust machine designed for processing rubber compounds. It features precision-engineered rollers to ensure uniform mixing and sheeting of rubber materials.

Overview

Professional Rubber Processing Capability

The XK-400 Rubber Mixing Mill is a robust and efficient machine engineered for precise processing of rubber compounds. It features heavy-duty construction for enhanced durability and stability during intensive mixing, kneading, and sheeting operations. Equipped with advanced safety mechanisms and precision-engineered rollers, it offers a reliable solution for consistent rubber material preparation.

Technical Specifications

Safety Features

- Emergency stop mechanisms
- Protective guards

Machine Type	Open Mixing Mill
Applications	Mixing, Kneading, Sheeting

Key Metrics

Performance Features

400 mm

Roller Diameter
