

XK-450 Rubber Mixing Mill

The XK-450 rubber mixing mill is designed for effectively mixing and processing rubber compounds. Its heavy-duty rollers ensure efficient shearing and blending for uniform consistency.

Overview

Industrial Rubber Mixing Mill

The XK-450 rubber mixing mill is engineered for high-performance processing and blending of rubber compounds. Built with heavy-duty rollers and a robust drive system, this machine ensures uniform material consistency and reliable operation in demanding industrial settings. Its design focuses on effective shearing capabilities, making it an essential asset for professionals requiring consistent material properties and long-term durability.

Technical Specifications

Applications

- Rubber compound mixing
- Material shearing
- Uniform material blending

Model	XK-450
Key Features	Heavy-duty rollers, Reliable drive system, Precise control panel, High-durability construction
