

XK-660 Open Rubber Mixing Mill

The XK-660 Open Rubber Mixing Mill is designed for mixing and processing rubber compounds. It features precision-engineered rollers for uniform mixing and consistent material output, with safety devices to protect operators.

Product Overview

Professional Rubber Mixing Solution

The XK-660 Open Rubber Mixing Mill is a robust and reliable machine specifically designed for the high-demand rubber processing industry. Featuring heavy-duty construction, this mill ensures long-term stability and consistency during the mixing, sheeting, and refining of rubber compounds. Its precision-engineered rollers guarantee uniform material output, while the open-frame design facilitates easier maintenance and cleaning for improved operational efficiency.

Technical Specifications

Model Identifier	XK-660
Core Applications	Mixing, Sheeting, Refining

Safety and Maintenance

- Operational Advantages**
- Heavy-duty construction
 - Precision-engineered rollers
 - Open design for easy access
 - Simplified cleaning process

Safety Systems	Yes
