

XLPE Insulated Power Cable

This XLPE insulated power cable is designed for electrical power transmission. It features XLPE insulation and a protective outer sheath, making it suitable for various applications requiring reliable and durable power cabling.

Product Overview

High-Performance XLPE Insulated Power Cable

This XLPE insulated power cable is engineered for reliable power transmission and distribution in demanding environments. Featuring advanced cross-linked polyethylene insulation, it provides superior thermal stability and electrical performance. The robust construction includes protective outer sheathing, making it suitable for industrial, infrastructure, and high-safety applications.

Technical Specifications

Rated Voltage	0.6/1 kV
Insulation Material	XLPE (Cross-linked Polyethylene)

Applications & Safety

Suitable Environments

- Power stations
- Subways and tunnels
- Skyscrapers
- Oil fields
- Coal mines
- Nuclear power plants

Safety Standards

Flame-Retardant, Fire-resistant, LSZH (Low Smoke Zero Halogen)

Construction Details

Cable Components

Component	Description
Conductor	Copper conductors
Insulation	XLPE layer
Inner Structure	Filling material and wrapping tape
Outer Layer	Protective outer sheath
