

Y-Type HVAC Strainer

This Y-type strainer is designed to safeguard pumps, meters, control valves, and other critical equipment by eliminating particulate matter from the flow. Its design ensures efficient filtration and minimizes pressure drop.

Product Overview

High-Efficiency Y-Type HVAC Strainer

The Y-Type HVAC Strainer is a vital protective component for heating and plumbing systems, designed to effectively remove particulate matter from fluid flow. By safeguarding critical equipment such as pumps, meters, and control valves, it ensures system longevity and consistent performance. Its unique Y-shaped configuration is engineered to provide efficient filtration while maintaining a minimal pressure drop across the system.

Technical Specifications

Available Sizes

- 1/2"
- 3/4"
- 1"

Model Reference Table

Code	Specification
Y00057	1/2"
Y00058	3/4"
Y00059	1"

Product Features

Quality Standards	Green Manufacturing, HVAC&R Optimized, Corrosion Resistant
Maintenance	Removable screen for periodic cleaning and debris removal
