

Y-Type Pipeline Strainer - 150lb

This Y-type strainer is applied in oil fields, chemical industries, and coal mines for environmental protection. Its primary function is to filter out unwanted particles from pipelines.

Overview

High-Performance Pipeline Protection

The A216 WCB Y-Type Strainer is engineered to protect critical downstream equipment like pumps, meters, and control valves by removing unwanted particles from the pipeline. Constructed from durable carbon steel, this strainer is designed for reliability in steam, liquid, and gas systems. Its Y-pattern design facilitates easy installation and maintenance, featuring a removable screen for efficient cleaning and long-term system performance.

Technical Specifications

Pressure Class

150 lb

Pressure Rating

Size

6 inch

Nominal Diameter

Material & Construction

Body Material

A216 WCB • Cast Steel • Carbon Steel

Connection Type

Flanged

Application

Key Features

- Y-pattern design for efficient flow
- Removable screen for easy maintenance
- Protects sensitive downstream equipment
- Durable cast steel construction

Compatible Media

Steam, Liquid, Gas
