

Yamaha SMT Nozzle Shaft Thrust Washer

This is a thrust washer designed for Yamaha SMT nozzle shafts. The component ensures optimal performance and longevity of the nozzle assembly within Yamaha SMT equipment.

Product Overview

Yamaha Nozzle Shaft Thrust Washer

This high-precision thrust washer, identified as KU1-M7152-00X, is a critical component for Yamaha SMT nozzle shafts. Engineered to exact standards, it ensures optimal mechanical performance and supports the longevity of your SMT assembly equipment. Designed for reliable operation, this part is an essential spare for maintaining precision in automated placement systems.

Technical Details

Condition

Original • New

Part Number

KU1-M7152-00X

Component Type

Thrust Washer

Compatibility

Compatible Machinery

SMT, Nozzle Shaft Systems
