

Yamaha SMT Sensor Assembly

This Yamaha sensor assembly is designed for use in SMT machines. It ensures accurate detection and control during component placement.

Product Overview

Yamaha SMT Sensor Assembly

This original, new-condition sensor assembly is specifically engineered for high-precision SMT equipment. Designed for seamless integration, it ensures reliable detection and control during automated component placement processes. It meets rigorous quality standards to provide consistent performance in industrial manufacturing environments.

Technical Specifications

Condition

Original New

Compatible Machine Series

YS12F

Part Number

KGA-M3455-11X

Related Components

Related Vacuum and Solenoid Valves

Part Description	Reference Part Number
Valve Assembly	KV6-M7171-10X
Vacuum Ejector ME12	KOGANEI-ME12
Solenoid Valve YV100XG	KV8-M7162-00X
Vacuum Valve YV88X	KGA-M7111-H0X
