

Yamaha SMT Transfer Belt

This transfer belt is designed for Yamaha SMT equipment. It is a crucial component in the transfer mechanism of pick-and-place machines.

Product Overview

Yamaha SMT Transfer Belt

This high-precision transfer belt is a critical component for automated SMT pick-and-place machinery. Designed for seamless integration, it ensures the smooth, accurate movement of components and PCBs during high-speed assembly. Manufactured to meet rigorous quality standards, this part provides the reliability and performance required for demanding electronic manufacturing environments.

Technical Details

Condition

Original • New

Part Number

KGY-M9123-00X

Compatible Components

Supplementary Parts List

Part Number	Description
KHJ-MC10E-00	SCREW, FLAT HEXLOBE 5
KHJ-MC110-10	MOTOR, PEEL 1
KHJ-MC139-00	SHAFT, IDLE GEAR 1 6
KHJ-MC151-00	GEAR, IDLE P1 1
KHJ-MC16V-00	P/O LEVER ASSY
