

YAMAHA YV100II SMT Shaft Head Assembly

This is a shaft head assembly designed for YAMAHA YV100II SMT pick-and-place machines. It ensures accurate component placement and smooth operation.

Product Overview

High-Precision SMT Shaft Head Assembly

This shaft head assembly is a critical component designed for precision SMT machinery, ensuring accurate component placement and smooth mechanical operation. Engineered to meet strict production standards, it facilitates reliable performance in high-speed surface mount technology environments. The assembly incorporates advanced sensor integration for consistent feedback and operational stability.

Compatibility

Supported Machine Series YV100II, YV100X, YV100XTG

Component Identification

Primary Part Number KM1-M710S-00X

Sensor Specifications

Integrated Sensor Modules

Component ID	Description
KV7-M654F-00X	SENSOR 3 E2S-Q22
KV7-M654G-00X	SENSOR 4 E2S-Q22B
KV8-M7160-00X	SENSOR HEAD ASSY 7383
KM9-M7158-00X	SENSOR, HEAD GXL8HUB
KM9-M7159-00X	SENSOR, R AXIS
