

YAMAHA YV100II SMT Shaft Head Assembly

This is a shaft head assembly designed for YAMAHA YV100II SMT equipment. It is a critical component for the accurate and reliable placement of electronic components onto printed circuit boards (PCBs).

Product Overview

Professional SMT Component

This high-precision shaft head assembly is a vital spare component designed for surface mount technology equipment. Engineered for reliability and accurate performance, it serves as a critical replacement part to ensure consistent operation of pick-and-place machinery. This item is offered as an original, new unit to meet professional repair and maintenance standards.

Technical Specifications

Condition

Original • New

Part Number

KM8-M712S-A00

Compatibility

Compatible Assemblies

Component Category	Typical Part Series
Servo Board	KM5 / KGN / KKE / KHN
Driver Board	KJ0 / KGK / KGN
System Unit	KW3 / KGK / KHL
Vision Unit/Board	KV1 / KGJ
Panel Assemblies	KJ0 / KGA / KGK

Supported Series

YV100XG, YG200, YS24
