Overview

Compact Excavator Performance

The YC35-8 is a high-performance compact excavator engineered for versatile operation in construction, landscaping, and utility environments. It combines a robust hydraulic system with a powerful digging force to ensure maximum efficiency in confined spaces. Built for reliability and durability, this machine offers exceptional maneuverability and operator comfort, making it an ideal choice for demanding urban and residential job sites.

Performance Metrics

Maximum Digging Force	22.19 kN
Maximum Traction	29 kN
Maximum Gradeability	58 %
