

Yellow Insulating Foam Component with Cylindrical Opening

This is a yellow insulating foam component. It features a cylindrical opening at one end and a rectangular tapered body.

Product Overview

Professional Insulation Solution

This yellow insulating foam component is precision-engineered for applications requiring thermal insulation or sound dampening. Featuring a distinct cylindrical opening, the part is designed to facilitate airflow or serve as a structural channel within equipment assemblies. Its specialized material construction makes it a reliable choice for protecting sensitive electronic components or managing acoustic environments.

Technical Specifications

Material	Insulating Foam
Color	Yellow
Design Features	Cylindrical Opening, Tapered Body, Thermal Insulation, Sound Dampening

Application Data

Primary Applications

- Electronic equipment housing
- Computer peripheral cooling
- Airflow management
- Acoustic protection
