

# Yellow Rectangular Electronic Component with Square Plate

This electronic component features a rectangular block with an angled side and a square plate on top. The square plate has a circular hole in its center.

## Product Overview

### Professional Electronic Component

This rectangular electronic component features a robust design with a precision-engineered square plate mounted on the top surface. The inclusion of a central circular aperture indicates a design optimized for secure mounting or integration within technical machinery. Its distinct muted yellow finish and durable construction make it a reliable choice for professional engineering and industrial assembly applications.

## Physical Properties

### Mounting Features

- Square top plate
- Central circular hole

Shape Configuration	Rectangular body with angled side and square top plate
Color Finish	Muted yellow / gold

## Application Specifications

Category	Electronics, Machinery Component, Industrial Parts
