

YG100 212A SMT Pick and Place Nozzle

This is a YG100 212A pick and place nozzle for SMT machines. It ensures accurate component placement.

Product Overview

Precision SMT Placement Nozzle

This high-quality pick and place nozzle is engineered for precision component assembly. Designed for durability and consistent performance, it ensures accurate placement in high-speed SMT processes. This replacement part is built to optimize production efficiency and reduce machine downtime.

Specifications

Part Number	KGS-M7720-A0XD
Alternative ID	949839600642
Nozzle Type	212A
Dimensions	1.7 x 0.94

Compatibility

Available Nozzle Series

- YG100 Series
- YG200 Series
- YV100X Series
- YV86/YV100D Series
- YV64D Series

Compatible Machine Series	YG100, YG200, YV100X, YV86, YV100D, YV64D
