

# YN920D Wheel Loader for Construction

The YN920D wheel loader is a robust construction machine designed for efficient material handling. Its compact design and maneuverability make it suitable for various construction sites and applications.

## ADDITIONAL IMAGES

## Product Overview

### Professional Performance

The YN920D is a versatile wheel loader engineered for high efficiency in construction and material handling tasks. With a robust chassis and powerful hydraulic system, it ensures precision and reliability in demanding work environments. Its compact design allows for excellent maneuverability in confined spaces, while the ergonomically designed cabin maximizes operator comfort and productivity.

## Technical Specifications

Rated Load Capacity	1200 kg
Bucket Capacity	0.6 m3
Rated Power	33 kW
Maximum Speed	23 km/h
Operating Weight	3500 kg
Tyre Specification	16/90-16

## Dimensions and Clearance

### Detailed Physical Dimensions

Attribute	Value
Overall Dimensions (LxWxH)	5050*1860*2630 mm
Dumping Height	3010 mm
Max Dumping Reach	810 mm
Wheel Base	2210 mm
Wheel Thread	1430 mm
Min Ground Clearance	267 mm
