

YS Feeder Storage Cart for Electronic Assembly

This stainless steel cart is designed for storing and transporting YS feeders. It features 40 stations per layer, two layers, and smooth rolling casters.

Product Overview

Optimized Feeder Storage Solution

This durable stainless steel storage cart is specifically engineered to streamline the organization and transportation of electronic assembly feeders. With its two-tier design, it offers a high-capacity storage solution that significantly improves workflow efficiency on the production floor. The unit is designed for ease of mobility and secure positioning, making it an essential component for modern electronic manufacturing environments.

Technical Specifications

Total Storage Capacity

80 pcs
