

Zinc Alloy Die Cast European Type Turnbuckle

These European type turnbuckles are manufactured from zinc alloy and feature a zinc-plated finish. They are designed for adjusting tension in rope, cable, and tie rod assemblies.

Product Overview

European Type Turnbuckles

These European-style turnbuckles are precision-manufactured using high-quality zinc alloy and finished with a zinc plating for enhanced corrosion resistance. Designed for versatility, they are ideal for adjusting tension and length in rope, cable, and tie rod assemblies. Their robust construction ensures reliable performance in various applications requiring precise tensioning and secure connections.

Technical Specifications

Material	Zinc Alloy
Finish	Zinc Plated
Style	European Type

Configuration Options

End Configurations	Hook and Eye, Eye and Eye, Hook and Hook
--------------------	--

Applications

Typical Applications

- Rope tensioning
- Cable assembly adjustment
- Tie rod tensioning
- General rigging
