

Zinc-Coated Steel Coil

Galvanized steel coil is coated with zinc for enhanced corrosion resistance. This material is available in various thicknesses and widths for diverse applications like roofing and automotive parts.

Product Overview

High-Performance Galvanized Steel Coils

These zinc-coated steel coils are engineered for superior corrosion resistance and durability, making them an essential material for various industrial and construction applications. With a versatile range of thicknesses and widths, they are suitable for roofing, siding, automotive parts, and appliance manufacturing. The material offers excellent formability and weldability, ensuring it meets the rigorous demands of modern fabrication processes.

Technical Specifications

Thickness Range

0.13 mm

Min Thickness

3 mm

Max Thickness

Width Range

600 mm

Min Width

1500 mm

Max Width

Available Grades

- SGCC
- CGCC
- SGCD
- SPCC
- DX51D
- DX52D
- DX53D

International Standards

AISI, ASTM, BS, DIN, GB, JIS

Applications

Primary Applications

Roofing • Siding • Ductwork • Automotive Parts • Appliances
