

Zinc-Coated Steel Loading Ramps with Adjustable Straps

These loading ramps are constructed from high-strength stamped steel and coated with zinc for corrosion resistance. They include adjustable straps for secure loading and reflective labels for nighttime visibility.

Product Overview

Professional Grade Loading Solution

These zinc-coated steel loading ramps are engineered for maximum durability and corrosion resistance, making them ideal for heavy-duty outdoor use. Designed with rubber-tipped fingers, they provide superior grip while protecting vehicle surfaces from scratches during the loading process. With included adjustable safety straps and integrated reflective labels, these ramps offer a reliable and secure solution for transporting ATVs, motorcycles, and garden equipment.

Technical Features

Material & Finish	High-strength stamped steel with zinc coating
Safety Features	Rubber-tipped fingers, Reflective labels, Corrosion resistant

Compatibility

Suitable Equipment

- ATVs
- Motorcycles
- Dirt bikes
- Snow blowers
- Garden tillers
