Product Overview

Professional EMT Connector Solution

This Zinc Die-Cast EMT Set Screw Connector is engineered for reliable electrical installations, providing a secure connection between EMT conduit and electrical boxes or enclosures. Constructed from high-quality zinc die-cast and steel, it offers excellent corrosion resistance and durability for long-term performance. The set screw mechanism ensures a tight, reliable fit, making installation and maintenance straightforward for professional electrical projects in dry locations.

Technical Specifications

Material	Zinc Die-Cast, Steel
Color	White
Corrosion Resistance	Yes

Application

Suitable Locations

Dry Locations

Key Features

- Smooth inner layer
- Flexible screw mechanism
- Ensures grounding continuity
- Easy installation and removal

Primary Usage

Connect EMT tubes to a box or enclosure
