

Zinc Plated Diamond Mesh Fencing

This zinc plated mesh is constructed in a diamond (Ling) shape. The zinc plating enhances its resistance to corrosion, making it suitable for outdoor applications.

Product Overview

High-Durability Diamond Mesh Fencing

This zinc-plated diamond mesh fencing, often referred to as 'Ling-shaped' network, provides an effective and durable solution for security and containment needs. The zinc plating process ensures superior corrosion resistance, making it suitable for both indoor and outdoor environments. Its robust diamond pattern offers structural integrity for fencing, security enclosures, and animal containment applications.

Technical Specifications

Surface Treatment	Zinc Plated
Mesh Pattern	Diamond / Ling-shaped
Common Applications	Security Fencing, Animal Containment, Security Enclosures, Barrier Construction

Features

Key Benefits

- Corrosion-resistant zinc coating
- High structural integrity
- Versatile diamond-shaped mesh design
- Suitable for various barrier applications
