

Zinc Plated Hex Head Bolt

High-strength, zinc-plated hex bolts ensure secure fastening in demanding environments. The hexagonal head facilitates easy installation with standard wrenches, and the zinc coating provides enhanced resistance to corrosion.

Product Overview

Industrial Grade Zinc Plated Hex Bolts

These high-strength zinc-plated hex head bolts are engineered for reliable performance in demanding construction, automotive, and machinery applications. With a durable zinc finish for enhanced corrosion resistance, they provide long-lasting security in diverse environments. The versatile design supports multiple international standards, ensuring compatibility with your specific industrial requirements.

Standards & Compliance

Supported Standards

DIN, ISO, ANSI, ASME, BS, AS, JIS

Technical Specifications

Material

- Carbon Steel
- Alloy Steel

Available Finishes

Zinc Plated • Black Oxidized • Hot Dip Galvanized • Dacromet • Plain

Grades

8.8, 10.9, 12.9, gr5, gr8

Logistics & Supply

Supply Capacity

800 tons

Monthly Supply

Delivery Time

7-30 days
