

Zinc-Plated Mild Steel Hook Latch

This hook latch is made from zinc-plated mild steel or stainless steel. It features a robust design for secure fastening and is suitable for various applications requiring a reliable latching mechanism.

Product Overview

Robust Fastening Solution

This hook latch is constructed from zinc-plated mild steel, providing essential durability and corrosion resistance for demanding environments. Its robust design ensures secure fastening, making it suitable for a wide range of industrial, commercial, and residential applications. The unit arrives as a complete, ready-to-use solution, including all necessary installation components such as the bolt, nut, and spring.

Material & Construction

Material	Zinc-Plated Mild Steel
Finish Properties	Corrosion Resistant, Durable

Installation & Use

Included Components

- Bolt
- Nut
- Spring

Suitable Environments

Industrial • Commercial • Residential
