

Zinc Plated Snap Hook

This snap hook is zinc plated for increased durability. It features a spring-loaded gate that allows for quick and secure connections.

Product Overview

Professional Utility Snap Hook

This zinc-plated snap hook is engineered for efficient, secure, and quick-release connections in diverse environments. Its robust metal construction paired with a reliable spring-loaded gate ensures ease of use for repetitive attachment tasks. The protective zinc plating enhances the unit's resistance to corrosion, making it a dependable choice for both indoor and outdoor light-duty rigging applications.

Technical Specifications

Material Finish

Zinc Plated • Corrosion Resistant

Core Design Features

- Spring-loaded gate mechanism
- Quick-connect design
- Durable metal frame

Applications

Common Industrial Applications

Light-duty rigging, Equipment attachment, General purpose hardware
